**Subject:** RE: AK NMVTIS - TC005

This email comes from an external source, so remember, Think Before You Click!

I have reset the data for the test cases that failed except for the following:

I did not reset TC004 as I am just looking for a good HC. Let me know if you need to re-execute in order to produce the good HC.

For TC009 you will need to redo the CSOT in TC008 which already passed.

Thanks,  
Susan Creighton / 703.908.5893 office

**Subject:** RE: AK NMVTIS - TC005

As far as I know, any in failed state are fine to reset.

We have changes coming down the pipeline for both tracking brands and tracking current titles, as per NMVTIS messages sent. I'm attempting to steer clear of anything that involves brands or undos of any sort as a result, but I think that accounts for the majority of remaining tests cases.

Here's my data for TC005:

Title Issue Date	New VIN	New Make	New Model Year	New Title Number	New STK	New Odometer Reading	New Odometer Unit of Measure	Brand Issue Date
20170713	AIVALIDVIN1TSTB05	INFI	2004	7277391	40183824	EXEMPT

Hi Dillon,

TC005 passed. You are correct the duplicate created does not affect the scenario we were testing for. But please do let me know before you test the test cases that have failed so I can reset them as most will be affected if the data remains the same. I left them as is in case you refuted anything. But if you are okay with them, I can go ahead and reset the ones that I show as failed.

Thanks,

Susan Creighton / 703.908.5893 office

Hi Dillon,

When changing the VIN for a vehicle moving into state you need to use the UT (CSOT) transaction and fill the Old VIN field with the original VIN and the New VIN field with the new VIN. This will cause the old title record to move to the history of the new title record. If you send a UA with the new information the old title will remain on NMVTIS in current and look like it is a negotiable title.

Thanks,  
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!  
Hi Dillon,

When changing the VIN for a vehicle moving into state you need to use the UT (CSOT) transaction and fill the Old VIN field with the original VIN and the New VIN field with the new VIN. This will cause the old title record to move to the history of the new title record. If you send a UA with the new information the old title will remain on NMVTIS in current and look like it is a negotiable title.

Thanks,  
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

[The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.](#)

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

Please proceed with H4 ( CSOR) .

I need to step out for lunch, and I will be back in an hour.

Thanks,  
Asma

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

✱	DDVDOB	DRIVER DATE OF BIRTH	1	19661211
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Siri, are you ready for me to send the H4 CSOR?

I will only be able to test this morning until noon your time today.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

It appears the CSOR completed successfully and the state was saved correctly. So this apparently is a code issue with determining the status. I am investigating.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = [111999999](#)
- Duplicate Driver Social Security Number (DDVSS8) = [111999999](#)

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

✱	DDVDOB	DRIVER DATE OF BIRTH	1	19661211
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3

to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3

to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOL is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

This email comes from an external source, so remember, Think Before You Click!

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**From:** Ferro, Anne <AFerro@aamva.org>  
**Sent:** Monday, July 24, 2017 11:09 AM  
**Subject:** Autonomous Vehicles and Preemption  
**Attachments:** Chief Administrator Letter on AVs.pdf

Dear Chief Administrators:

As you may have noticed in the Legislative Alert earlier this week, AAMVA has been collaborating with the National Governors Association (NGA), the National Conference of State Legislatures (NCSL), the American Association of State and Highway Transportation Officials (AASHTO) and the Governors Highway Safety Association (GHSA) to educate Congressional staff on a potential path forward for the testing and deployment of autonomous vehicles. While the collective group had been making headway with the House Energy and Commerce Committee on their revised [draft language](#) regarding preemption (outlined in Section 2), **recent lobbying efforts by certain industry groups have stalled bipartisan negotiations toward language limiting the extent of that preemption and preserving the operational safety oversight authorities of the states.**

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of the states. However the Committee has not been able to accommodate language limiting the scope of preemption and has retained language that leaves a state's authority over the operational safety of vehicles unclear. Some members of the Committee have recommended an increased voice in sharing state concerns. We continue to follow the lead of NGA and wanted to alert you in the event you are **consulting with your Governor's office on this matter. You may want to ensure that they are aware of the issue as it could raise state preemption concerns.**

As described in the alert, the draft language states that *"No state or political subdivision of a State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard or other provision having the force and effect of law is identical to a standard prescribed under this chapter."* This language would preclude a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, *"(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles."* This language could be considered at odds with the preemptive language as to what constitutes "an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems" given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA's earlier alert can be found [here](#). If we can be of any further assistance, please contact Ian Grossman or Cian Cashin at [igrossman@aamva.org](mailto:igrossman@aamva.org) or [ccashin@aamva.org](mailto:ccashin@aamva.org).

Sincerely yours,

Anne

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3

to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Gary,

Could you also please send test case H3 again as I did not see it in our logs?

Thank you

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPES5) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

---

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

This email comes from an external source, so remember, Think Before You Click!  
Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Ok, F5 looked good but for F6, I received 'ERROR PROCESSING REQUEST' instead of 'REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)'.

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: SPEXS ID question

Mina,  
Even for non-commercial class, we ask that you not populate the value with text that is not on the enumerated list. You can leave it empty or provide the status based on the license.

The reason we are asking this is because AMIE, being raw text, can accept any value that you provide. However, when States come onboard using Web Services, XML can only accept items that are on the pre-defined list. For example, in this case the XML enumerated list will contain (LIC, ELG, NON, RPD). If you send in 'ID', we will pass that to the Web Service SOI/NSOR, but since we cannot put the 'ID' value in this pre-defined list, the 'ID' will be transferred to the WS State in a separate conversion exception block. It will help the receiving States if we can minimize such conversion exceptions when a NIEM response is provided.

Thank You,  
Ashish

**Subject:** RE: SPEXS ID question

Sure Mina. Commercial Class is optional and you can leave it blank. We would rather have you leave the field empty rather than populate it with a value of "ID". We do not know if receiving States have validations on their end to accept only the enumerated values (LIC, ELG,..). Also, if the ID is associated with a CDLIS pointer then that status of "ID" could cause confusion.

Thank You,  
Ashish

**Subject:** RE: SPEXS ID question

Mina,

You do not have to send withdrawal information and DL Statuses when responding on an ID. We do ask that you zero out all the "numb" fields. These elements are not associated with the ID, but these count elements on the primary H messages (HB/HC/HD/HG) are used by the receiving State to determine if other messages (H2... H7) will be arriving. For example: A value of zero for Total Accidents Sent (DDTTAS) on the HB indicates that no Driver History Accidents (H4) message is expected. If the count fields are left empty, the receiving States may encounter an error. So, although not needed from a business perspective, we ask that these fields be zeroed to avoid any technical issues at the receiving State.

Thank You,  
Ashish

**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: SPEXS ID question

Hi Siri,

Thank you for the response. I'm sorry, I'm still not certain I'm clear.

Yes, our ID and License are two separate documents (which is why we have two separate pointers), although they share the same credential number. So my license and my id "DLN" are the same number.

This question is specifically related to how we should populate the various fields when the document type = '3'. It's not really state rules I need, it is what do the other states expect? The issue and expiration dates for the ID, I understand. However, I'm still not clear by what you mean by **you will send only the State ID related information on the response when the inquiry is on the State ID card.**

The other required fields for the 14/1 block on an HC are:

CLMF-NUMB-PERMIT  
CLMF-DESC-NON-CDL-STATUS  
CLMF-DESC-CDL-STATUS  
CLMF-INDC-DL-WDRAW-PEND  
CLMF-NUMB-DL-RESTR  
CLMF-NUMB-CONV-SENT  
CLMF-NUMB-CONV-RECORD  
CLMF-NUMB-ACC-SENT  
CLMF-NUMB-ACC-RECORD  
CLMF-NUMB-WDRAW-SENT  
CLMF-NUMB-WDRAW-RECORD

Since none of these apply to the ID cards, should we be zeroing out all the "numb" fields? Should we be using the license statuses even though they don't apply to the ID card? And should we indicate if there is a pending withdrawal (also not applicable to the ID card). I'm asking because we would rather not send license information on an ID inquiry or CSOR transaction – however, there are all these fields that are required.

**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: SPEXS ID question

Hi Mina,

The S2S Specifications document has been updated at the time to indicate the Issue and Expiration Dates on the 14/1 block to be Credential Issue and Expiration dates so they are no longer just Driver License Issue and expiration dates. Hence, if it is a State ID, you will send the Issue and Expiration Dates for that document issued. In case that is what you are currently sending on the 14/1 block for a State ID credential, it is correct. Comments are highlighted below for your questions

Now, since this driver also has a class D, we had been reporting the class D dates (highlighted). However, I can see where they actually want the issue/expiration of the ID. So that is making me question the rest of the data. — Are the Non Commercial Class D license and the State ID card issued as two different documents? If these are two individual documents, then you will send only the State ID related information on the response when the inquiry is on the State ID card. You will send the Non Commercial License Information when the Inquiry is on the Doc type = 1 (License). Having said that, I believe this depends on how the State has the two documents issued so it is dependent on the State rules.

1. Should we still be reporting commercial/non-commercial classes at all, or should we report this as a noncommercial class "ID"? (Same as above)
2. What license/cdl status should we use? If they have an expired license but unexpired ID, should the first status be LIC or ELG? This depends on how the State sending the information on State ID cards. We have seen some states send all the information on the record for a State ID as well.
3. What about permit counts and all the rest of the fields? Should we continue to fill them in based on license data, or leave them blank or zero them out -Same as above.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** SPEXS ID question

Hi Siri,

It was reported to me that we are sending the issue/expiration dates of our license in the 14-1 block when the document type is "3", or ID. I'm a little confused now on what needs to go in the 14-1 block for IDs, and am hoping you can help. Here is an example:

```
UTT244          UNIFIED NETWORK INTERFACE R3.1          05/16/2017
TEST           MESSAGE LOG (D)                          12:37:37
Log Date: 170516 Log Time: 110928 Log Sequence: 0001 Message Type: 1

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!  
Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

## FEDERAL NEWS

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard,

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the [program-at-a-glance](#) and [register here](#)!

## 2017 Annual International Conference: Autonomous Vehicles Innovation

The [2017 Annual International Conference](#) is just around the corner, August 21-23 in San Francisco, California! In our Session Spotlight:

### Autonomous Vehicles Innovation

Chris Urmson, CEO, Aurora Innovation

Tuesday, August 22

The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to

deploy fully autonomous vehicles.

Visit the [2017 Annual International Conference](#) website today for more information and to register online!

## This Week's Webinars

[NMVTIS State Web Interface \(SWI\) – Instant Title Verification Using the VIN Search Feature](#)

Tuesday, July 25, 2017, 2:00-3:00PM

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft

Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

## FEDERAL NEWS

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard,

The [2017 Annual International Conference](#) is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the [program-at-a-glance](#) and [register here!](#)

## 2017 Annual International Conference: Autonomous Vehicles Innovation

The [2017 Annual International Conference](#) is just around the corner, August 21-23 in San Francisco, California! In our Session Spotlight:

### Autonomous Vehicles Innovation

Chris Urmson, CEO, Aurora Innovation

Tuesday, August 22

The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to

deploy fully autonomous vehicles.

Visit the [2017 Annual International Conference](#) website today for more information and to register online!

## This Week's Webinars

[NMVTIS State Web Interface \(SWI\) – Instant Title Verification Using the VIN Search Feature](#)

Tuesday, July 25, 2017, 2:00-3:00PM

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft

Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

## FEDERAL NEWS

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard,

Please respond to these surveys from Missouri, Indiana, British Columbia, District of Columbia, North Carolina, Pennsylvania, Ontario, and Ohio.

**Vehicle Insurance Verification for Driver Testing** (Ends 08/14/2017) Responses received from CA, DC, ID, MD, NC, NE, TX, VA, VT, WA.

**Employee Learning & Development / Training Process** (Ends 08/09/2017) Responses received from AR, ID, UT, VT.

**Cell Phone Blockers & In-Vehicle Telematics** (Ends 08/14/2017) Responses received from BC, DC, FL, ID, IL, MT, NC, NE, NH, OR, SC, TX, VA, WA.

**Title Brand/Damage Disclosure Forms** (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, MD, ME, MN, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

**Electronic Crash Reporting Requirements** (Ends 08/23/2017)

**Supplying Vehicle Records to Research Entities** (Ends 08/14/2017) Response received from ID, IL, KY, SC, VA, VT.

**Document Management** (Ends 08/10/2017) Responses received from CA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

**DMV's Providing Photos to Government Agencies** (Ends 08/05/2017) Responses received from CA, CO, ID, MO, ND, NE, NH, NM, OR, TX.

**Permanent Commercial Trailer Plate Registration** (Ends 07/28/2017) Responses received from AL, CA, FL, GA, ID, IN, MD, ME, MI, MO, NC, ND, NH, OR, QC, SC, UT, VA, VT, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to [webportalsupport@aamva.org](mailto:webportalsupport@aamva.org) or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

**Register Now And Save! 2017 Annual International Conference**

The [2017 Annual International Conference](#) is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the [program-at-a-glance](#) and [register here](#)!

**2017 Annual International Conference: Autonomous Vehicles Innovation**

The [2017 Annual International Conference](#) is just around the corner, August 21-23 in San Francisco, California! In our Session Spotlight:

<http://images.magnetmail.net/images/clients/AAMVA/Events/ChrisUrmsonHSTWIR.jpg>**Autonomous Vehicles Innovation**

Chris Urmson, CEO, Aurora Innovation

Tuesday, August 22

The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to deploy fully autonomous vehicles.

Visit the [2017 Annual International Conference](#) website today for more information and to register online!

**This Week's Webinars**

**NMVTIS State Web Interface (SWI) – Instant Title Verification Using the VIN Search Feature**

Tuesday, July 25, 2017, 2:00-3:00PM

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

**NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 1**

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

[http://images.magnetmail.net/images/clients/AAMVA/twir\\_root/TWIRJurisdictionNewsBannerNew.jpg](http://images.magnetmail.net/images/clients/AAMVA/twir_root/TWIRJurisdictionNewsBannerNew.jpg)

### **Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers**

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### **AZDPS Receives \$600,000 To Improve Computerized Dispatch**

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

[http://images.magnetmail.net/images/clients/AAMVA/twir\\_root/TWIRFederalNewsBannerNew.jpg](http://images.magnetmail.net/images/clients/AAMVA/twir_root/TWIRFederalNewsBannerNew.jpg)

### **U.S. House Subcommittee Moves Autonomous Vehicles Legislation**

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law is identical to a standard prescribed under this chapter." This language precludes a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general. For full information, see the [AAMVA Legislative & Regulatory Alert](#)

### **Now Available - 2017 Child Passenger Safety Week / National Seat Check Saturday Campaign Materials**

Every 33 seconds, one child under the age of 13 is involved in a crash. Many times deaths and injuries can be prevented by proper use of car seats, boosters, and seat belts. NHTSA's [Traffic Safety Marketing](#) has put together this toolkit with downloadable campaign materials and information on how to generate awareness about child car safety in your community. [Click here](#) and get your campaign materials now.

### **IFTA/IRP Managers' and Law Enforcement Workshop**

The [IFTA/IRP Managers' and Law Enforcement Workshop](#) will take place September 26-28, 2017 in Salt Lake City, UT. This workshop provides an in-depth exploration of issues impacting IRP, IFTA,

law enforcement and the motor carrier industry in general. This year's program will include the ELD mandate, autonomous vehicles, peer review findings, unreceipted fuel, how attorneys prosecute IRP or IFTA cases, and an outside demonstration of roadside technology. [Read more about the workshop.](#)

### **GHSA 2017 Annual Meeting: Highway Safety in a New Era**

Registration for [GHSA's 2017 Annual Meeting](#) is now open! Register online [here](#).

From a new Administration in Washington, D.C., to new technologies, to new behavioral challenges, we are truly entering a new era in traffic safety. The Governors Highway Safety Association's 2017 Annual Meeting, September 16-20 in Louisville, Kentucky, will explore these new challenges and opportunities and consider how the highway safety community can best respond to drive down crashes and fatalities.

### IFTA/IRP Managers' and Law Enforcement Workshop

The [IFTA/IRP Managers' and Law Enforcement Workshop](#) will take place September 26-28, 2017 in Salt Lake City, UT. This workshop provides an in-depth exploration of issues impacting IRP, IFTA, law enforcement and the motor carrier industry in general. This year's program will include the ELD mandate, autonomous vehicles, peer review findings, unreceipted fuel, how attorneys prosecute IRP or IFTA cases, and an outside demonstration of roadside technology. [Read more about the workshop.](#)

### GHSA 2017 Annual Meeting: Highway Safety in a New Era

Registration for [GHSA's 2017 Annual Meeting](#) is now open! Register online [here](#). From a new Administration in Washington, D.C., to new technologies, to new behavioral challenges, we are truly entering a new era in traffic safety. The Governors Highway Safety Association's 2017 Annual Meeting, September 16-20 in Louisville, Kentucky, will explore these new challenges and opportunities and consider how the highway safety community can best respond to drive down crashes and fatalities.

**Vehicle Insurance Verification for Driver Testing** (Ends 08/14/2017)  
Responses received from CA, DC, ID, MD, NC, NE, TX, VA, VT, WA.

**Employee Learning & Development / Training Process** (Ends 08/09/2017) Responses received from AR, ID, UT, VT.

**Cell Phone Blockers & In-Vehicle Telematics** (Ends 08/14/2017)  
Responses received from BC, DC, FL, ID, IL, MT, NC, NE, NH, OR, SC, TX, VA, WA.

**Title Brand/Damage Disclosure Forms** (Ends 08/11/2017)  
Responses received from AL, FL, IA, ID, IL, IN, MD, ME, MN, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

**Electronic Crash Reporting Requirements** (Ends 08/23/2017)

**Supplying Vehicle Records to Research Entities** (Ends 08/14/2017) Response received from ID, IL, KY, SC, VA, VT.

**Document Management** (Ends 08/10/2017) Responses received from CA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

**DMV's Providing Photos to Government Agencies** (Ends 08/05/2017) Responses received from CA, CO, ID, MO, ND, NE, NH, NM, OR, TX.

**Permanent Commercial Trailer Plate Registration** (Ends 07/28/2017) Responses received from AL, CA, FL, GA, ID, IN, MD, ME, MI, MO, NC, ND, NH, OR, QC, SC, UT, VA, VT, WI.

## 2017 Annual International Conference: Autonomous Vehicles Innovation

The [2017 Annual International Conference](#) is just around the corner, August 21-23 in San Francisco, California! In our Session Spotlight:

### Autonomous Vehicles Innovation

Chris Urmson, CEO, Aurora Innovation

Tuesday, August 22

The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to

deploy fully autonomous vehicles.

Visit the [2017 Annual International Conference](#) website today for more information and to register online!

## This Week's Webinars

[NMVTIS State Web Interface \(SWI\) – Instant Title Verification Using the VIN Search Feature](#)

Tuesday, July 25, 2017, 2:00-3:00PM

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft

Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

## FEDERAL NEWS

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard,

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

## FEDERAL NEWS

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard,

## Register Now And Save! 2017 Annual International Conference

The [2017 Annual International Conference](#) is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the [program-at-a-glance](#) and [register here](#)!

## 2017 Annual International Conference: Autonomous Vehicles Innovation

The [2017 Annual International Conference](#) is just around the corner, August 21-23 in San Francisco, California! In our Session Spotlight:

### Autonomous Vehicles Innovation

Chris Urmson, CEO, Aurora Innovation

Tuesday, August 22

The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to

deploy fully autonomous vehicles.

Visit the [2017 Annual International Conference](#) website today for more information and to register online!

## This Week's Webinars

[NMVTIS State Web Interface \(SWI\) – Instant Title Verification Using the VIN Search Feature](#)

Tuesday, July 25, 2017, 2:00-3:00PM

Before a jurisdiction issues a title or other ownership document or record, the SWI can provide information to help the jurisdiction determine whether the ownership documentation presented with the application are valid. The information supports jurisdictions' titling processes for both new and used vehicles. The Anti-Car Theft

Act requires each jurisdiction to perform an instant title verification check before issuing a title to an applicant claiming to have purchased the vehicle from an individual or entity in another jurisdiction. The SWI VIN search feature can be used to satisfy this legal requirement. In addition, the NMVTIS best practice is that jurisdictions perform an inquiry before issuing a title or other ownership document or record, whether or not the applicant claims to have purchased the vehicle in another jurisdiction.

### [NMVTIS Suspense Resolution for Online States \(AMIE Version\) - Part 1](#)

Thursday, July 27, 2017, 2:00-3:00PM

NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

## JURISDICTION NEWS

### Ohio Utilizes Portable Driver Simulators to Assess Driving Skills of New Drivers

As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop portable driver simulator systems (PDSS) to assess driving skills of new drivers before they test for their permanent Ohio driver license. The driver simulators will provide a pretest assessment at the BMV Driver Examination stations by testing applicants on their ability to appropriately respond to routine traffic stops, traffic lights, emergency vehicles, stop signs, railroad crossing, cross walks and school zones. The assessment score will not affect the ability to obtain a driver's license, but will only serve as diagnostic data for the BMV and CHOP during the pilot program. [Read more here.](#)

### AZDPS Receives \$600,000 To Improve Computerized Dispatch

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [Read more here.](#)

## FEDERAL NEWS

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee. Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard,

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** Weekly SPEXS Baseline Structured Testing Status - Alaska - 7/25/2017

Alaska Team,

Please find below the SPEXS Baseline Structured Testing Status as of 07/25/2017:

Current project status – **Green**

Target Implementation Date: December 4th, 2017

**AI status as of 07/25/2017**

- ✓ Currently Testing – **First Pass**
  - Test Start Date – 06/28/2017
  - Driver Streams Completed Till Date – A, B, C, E, F
  - Driver Streams In Progress - D, G, H
  - % of total First Pass Test completed – 50%
  - \* Anticipated completion date for First Pass – 8/18/2016  
(\* Please note that this date is based on the progress we have seen thus far. It is very possible that the actual end date [based on how many, and what type of, issues we find in the remainder of the test] falls before or after this anticipated date)
  
- ✓ Still to test:
  - First Pass – In Progress
  - End to End Pass – Yet to Start
  - CD31 process – Yet to Start
  - PDPS Baseline Structured Testing – Yet to Start
  - Smoke Test (with 'AK' gap code) - Yet to Start
  
- ✓ Issues/Comments:
  - None

Let me know if you have any questions.

Thanks,

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

This email comes from an external source, so remember, Think Before You Click!

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Ok, F5 looked good but for F6, I received 'ERROR PROCESSING REQUEST' instead of 'REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)'.

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Ok, shall we move on to Driver H? Pointer has been added and ready for H1/2.

Thank you,  
Siri

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPES5) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

For non-Commercial Class code, I am receiving the value as 'ID'.

Please find the communication between AK and our BA team on a similar question.

Can you please look.

Thanks,

Asma

I will try the UC again if you are ready. The current state of the data is back to the same when the test failed, so maybe I'm misinterpreting the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

My driver data is out of sync from the pointer due to previous failure on UC. I'll see if I can correct this and will let you know before I attempt the UC again.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you
